2.5 **J. Read the passage and answer the questions .**

Pastor was very interested in what happened to food when it got bad . In his laboratory , he had a microscope , an instrument for making things appear larger , so that people can see them easily . He spent a long time looking at a drop of liquid food under his microscope . He found that the microbes which made food bad could be killed if they were heated . Then, the food would keep good for a long time . In many cities , we are given milk in pasteurized bottles . This means that it is heated so as to destroy microbes .

30. What did Pastor use to see microbes ?

31. How could the microbes be killed ?

32. How is the milk pasteurized ?

33. If food is heated , .....

a. it destroys

b. it isn't pasteurized

c. its microbes are killed

d. we can keep it for just a short time

34. It isn't necessary to pasteurize milk .

a. True

b. False
