**Read the passage and complete the sentences with the given words. ( 4 points )**

**Cloze Test**

The Sun gives life to the Earth which it would have no life at all ...(40)... the energy that it receives from the Sun. The Sun is only one of millions and millions of ...(41)... in the Milky Way galaxy. We see it as a ...(42)... ball only because we are much ...(43)... to the Sun than to any of the other stars.

40. 1) near                      2) without                      3) against                      4) among

41. 1) planets                      2) neighbors                      3) stars                      4) facts

42. 1) beautiful red large    2) red beautiful large    3) large beautiful red    4) beautiful large red

43. 1) closer                      2) farther                      3) smaller                      4) longer

**N: Reading.**

**Read the passage and answer the questions. ( 8 points )**

**Giant panda**

The giant panda is the rarest member of the bear family. It is one of the world's most threatened animals. The giant panda is very well loved. It is a special animal for the World Wildlife Fund.

It has been their logo since the WWF was started in 1961.

Giant pandas live in forests in the mountain areas in central and southwest China.

As more roads and railway lines are built, the forest habitat is destroyed. When that happens, the pandas can't find enough bamboo to eat. And they need a lot to eat - almost 28 pounds of bamboo per day!

Through the efforts of the WWF and other groups, the number of giant pandas is on the rise. But it hasn't been enough to remove it from the endangered animal list.

44. Panda is a very popular animal. a) T  b) F

45. Mountain forests are the giant panda's habitat. a) T  b) F

46. How much bamboo does a giant panda eat in a day?

a) 12 pounds b) more than 25 pounds c) not mentioned in the passage.

47. Which of these actions will help save the giant pandas?

a) Building more roads so people can go and see them.

b) Keeping their habitat from being destroyed.

c) Moving all the pandas to zoos.

48. Why is the giant panda endangered?

a) Its habitat and food source are disappearing

b) It hunt other animals

c) Its habitat is being taken over by other animals.

Find the definition for each word.

49. threatened

a) the natural home of a plant or animal

50. rise

b) to be likely to happen or be in a bad situation increase

51. habitat

c) increase

Reading: 2( 4 points )

Mercury is the closest of the planets to the sun and so near to Earth. This planet is often called a morning star.

This's because Mercury shines brightly in the early morning just before the sun rises. It has also called an evening star for the same reason. If you moved to Mercury, you would not weigh as much as you do on earth, because Mercury is smaller and so has less gravity. If you weigh 30kgs on earth, you would weigh only about 12kgs on Mercury. There is almost no air on Mercury. It's temperature 800 and at night is 300. It goes around the sun every 88 Earth days and its days are so long. Each day in Mercury is 58 1/2 Earth days long.

52. We are heavier on Mercury a) T  b) F

53. The days on Mercury are as long as the Earth a) T  b) F

54. Which planet is called the evening and morning star?.....

55. Mercury goes around the sun.....

a-as fast as the Earth

b-faster than the Earth

c-slower than the Earth

d-sometimes faster than Earth

O: Specify falling & rising intonation symbols in front of each sentence. ( 4 points )
