THE GIFTED'S PERCEPTION

Nasreoddin K. Haghighi

The gifted has various attitudes: self-concept, attitudes to family, political and social attitudes, educational attitudes, locus of control, and educational attribution. Self-concept is a global evaluation about oneself. The studies present the gifted's self-concept, from the viewpoint of educational, social and leadership. This study is more firm than others. The gifted's self-concept is caused by personality factors and depends on person's intellectual, emotional and educational conditions. The gifted's educational attributions often arise from person's ability, endeavour, and powerful sources. Review of gifted's educational attitudes indicates that they tend to select special topics, study skills, competition, strong motivation to science, to benefit from computer, independent study, powerful relation with the teachers, preference of the personal-oriented teacher with personal and social excellences, and special program. Locus of control among the gifted is internal. Almost all of them participate in the political votes. (persian) pp. ۱۱۵-۱۱۶.

FACTORS OF THE TEACHER'S SUCCESS

N. K. Haghighi

Presents a ۵ dimensions inventory (behavioral, cognitional, personality, conceptual, and motivational) in about the special teacher's characteristics. Behavioral dimension is the most basic domain in the special teachers' success and other dimensions are placed in the order of priority. Generally, teaching skills is the most basic of factor in the teachers' success. Ability of consulting and guidance, personal attraction, giftology, perseverance for success, order, and organizing include ۷۰% of a successful teacher's characteristics. It seems that inventory is influenced by culture, reciprocal attitude, and educational program. (persian) pp. ۱۸۱-۱۸۷
